Obsidian Series™ 550D Quiet Mid-Tower Case

[NOTE: Above images are renderings – final product may differ]

SKU Live Date	**Jan 10th 2012**
Intro Phrase / Tagline	**The strong, silent type.**
Product Full Name/Title	**Corsair Obsidian Series 550D quiet mid-tower case**
25-Word Product Description	The Obsidian Series 550D has clean, refined looks, extensive noise dampening for silence, and modern features like USB 3.0 and SSD compatibility.
50-Word Product Description	The Obsidian Series 550D is an amazing combination of expandability and low noise. With sound dampened side panels, hard drive trays, and angled intake vents, the case is so quiet you'll barely know it's on. But with eight expansion slots, USB 3.0, native SSD compatibility, and removable hard drive cages, just about anything will fit inside it. And better yet – if down the road, you decide you'd rather get better cooling performance, the 550D can house up to ten fans with its removable top and side fan covers.
100-Word Product Description	The Obsidian Series™ 550D has been carefully engineered for noise reduction. The front and side panels are insulated with sound dampening material, and the hard drive trays and fans have soft silicon mounts to absorb vibration. The top and side panel vents are covered for noise reduction if you're not using them to install your own fans, and even the intakes are angled to reduce air noise. The rigid, stamped steel and brushed aluminum case holds some remarkable technology that makes it easy to build great systems. There's built-in USB 3.0 support, and the drive trays work with 2.5" SSDs. The removable hard drive bays allow customization for extra-long graphics cards and maximizing airflow. And, the easy-access side panels come off at the touch of a button for easy upgrades or simply admiring your work.
Product Features	• Insulated, sound dampening side and front panels • Six tool-free hard drive trays with integral SSD support and soft silicon sound dampening • Four tool-free optical drive bays • Angled air intakes for reduced noise • Covered vents for noise reduction if additional fans (not included) are not installed • Front panel USB 3.0 connectors and audio connectors • Cable routing cutouts with rubber grommets • Removable, reversible front panel • One-button side panel removal for quick access • Matte black interior • Three 120mm fans] • Top panel is compatible with 240mm radiators for dual-radiator Hydro Series™ CPU coolers and liquid cooling systems • Eight expansion slots for multi-GPU compatibility
